

Birtley Medical Group Mission Statement

“Compassionate, Competent, Community”

Birtley Medical Group is committed to providing you and your family with the highest possible quality care. We have a dedicated and professional team who are here to listen and provide patient centred care to you. Our values are centred on three key themes of compassion, competence and community.

Compassionate - patients deserve this in their care - it engenders trust and makes people feel valued.

Competent – everything we do is underpinned by appropriate training, support and development

Community - We serve our community and work in partnership with it. It means we respect one another and value equality and diversity.
